# 1. Scope

- 1.1 This datasheet is the characteristics of High-Precision Anti-Surge Thick Film Chip Resistors manufactured by UNI-ROYAL.
- 1.2 Suitable for reflow & wave soldering
- 1.3 Application monitors, power supplies, DVD, camcorder, laptop computer
- 1.4 AEC-Q200 qualified
- 1.5 Compliant with RoHS directive.
- 1.6 Halogen free requirement.

# 2. Part No. System

Part No. includes 14 codes shown as below:

2.1  $1^{st} \sim 4^{th}$  codes: Part name. E.g.: PS02、PS03、PS05、PS06、PS07、PS10、PS12 2.2  $5^{th} \sim 6^{th}$  codes: Power rating.

| E.g.: W=Norm   | 0   | "1~C   | y" = "1~10   | 6"  |   |  |  |   |                              |                |
|--|---|--|--|---|---|--|--|---|------------------------------|----------------|
| Wattag   |   | 3/4  | 1/2  | 1/3   | 1/4   | 1/8  | 1/10   | 1/16  | 1/20                         | 1              |
| Normal Siz   | e WH  | 07   | W2   | W3  | W4  | W8   | WA   | WG  | WM                           | 1W             |

# UR 厚聲集團 UNI·ROYAL High-Precision Anti-Surge Thick Film Chip Resistors

4. Marking

4.1 For PS02 size. Due to the very small size of the resistor's body, there is no marking on the body.

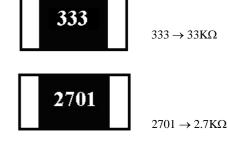

3 codes.

 $1^{st} \sim 2^{nd}$  codes are the significant figures of resistance value, and the rest code is the power of ten.

4.3  $\pm$ 1% tolerance products (E-96 series):

4 codes.

1<sup>st</sup>~3<sup>rd</sup> codes are the significant figures of resistance value, and the rest code is the power of ten. Letter "R" in mark means decimal point.

 4. 4 Standard E-96 series values of 0603 ≤1% : due to the small size of the resistor's body, 3 digits marking will be used to indicate the accurate resistance value by using the following multiplier & resistance code. Multiplier Code (for 0603 ≤±1% marking)

| Code       | А        | В        | С               | D               | Е        | F               | G        | Н               | Х    | Y                | Z    |
|------------|----------|----------|-----------------|-----------------|----------|-----------------|----------|-----------------|------|------------------|------|
| Multiplier | $10^{0}$ | $10^{1}$ | 10 <sup>2</sup> | 10 <sup>3</sup> | $10^{4}$ | 10 <sup>5</sup> | $10^{6}$ | 10 <sup>7</sup> | 10-1 | 10 <sup>-2</sup> | 10-3 |

Standard E-96 series Resistance Value code (for 0603≤±1% marking)

| Value | Code | Value | Code | Value | Code | Value | Code |
|-------|------|-------|------|-------|------|-------|------|
| 100   | 01   | 178   | 25   | 316   | 49   | 562   | 73   |
| 102   | 02   | 182   | 26   | 324   | 50   | 576   | 74   |
| 105   | 03   | 187   | 27   | 332   | 51   | 590   | 75   |
| 107   | 04   | 191   | 28   | 340   | 52   | 604   | 76   |
| 110   | 05   | 196   | 29   | 348   | 53   | 619   | 77   |
| 113   | 06   | 200   | 30   | 357   | 54   | 634   | 78   |
| 115   | 07   | 205   | 31   | 365   | 55   | 649   | 79   |
| 118   | 08   | 210   | 32   | 374   | 56   | 665   | 80   |
| 121   | 09   | 215   | 33   | 383   | 57   | 681   | 81   |
| 124   | 10   | 221   | 34   | 392   | 58   | 698   | 82   |
| 127   | 11   | 226   | 35   | 402   | 59   | 715   | 83   |
| 130   | 12   | 232   | 36   | 412   | 60   | 732   | 84   |
| 133   | 13   | 237   | 37   | 422   | 61   | 750   | 85   |
| 137   | 14   | 243   | 38   | 432   | 62   | 768   | 86   |
| 140   | 15   | 249   | 39   | 442   | 63   | 787   | 87   |
| 143   | 16   | 255   | 40   | 453   | 64   | 806   | 88   |
| 147   | 17   | 261   | 41   | 464   | 65   | 825   | 89   |
| 150   | 18   | 267   | 42   | 475   | 66   | 845   | 90   |
| 154   | 19   | 274   | 43   | 487   | 67   | 866   | 91   |
| 158   | 20   | 280   | 44   | 499   | 68   | 887   | 92   |
| 162   | 21   | 287   | 45   | 511   | 69   | 909   | 93   |
| 165   | 22   | 294   | 46   | 523   | 70   | 931   | 94   |
| 169   | 23   | 301   | 47   | 536   | 71   | 953   | 95   |
| 174   | 24   | 309   | 48   | 549   | 72   | 976   | 96   |

So the resistance value are marked as the following examples

1.96KΩ=196×10<sup>1</sup>Ω=29B

 $2.4\Omega = 124 \times 10^{-1}\Omega = 10X$ 

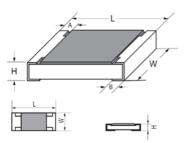

4.5 Standard E-24 and not belong to E-96 series values (≤±1%) of 0603 size: the marking is the same as 5% tolerance but marking as underline.

#### 5. <u>Ratings & Dimension</u>

#### 10. <u>One-pulse Limiting Electric Power</u>

10.1 Curve of Pulse Duration :

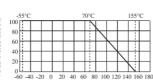

#### 10.2 Pulse Voltage Limit :

11. Structure

- 6. Termination (Outer) Sn

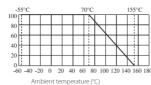

### 9. Derating Curve

Power rating will change based on continuous load at ambient temperature from -55 to 155 °C. It is constant between -55 to 70  $^{\circ}$ C, and derate to zero when temperature rise from 70 to 155  $^{\circ}$ C. Voltage rating:

Resistors shall have a rated direct-current (DC) continuous working voltage or an approximate sine-wave root-mean-square (RMS) alternating-current (AC) continuous working voltage at commercial-line frequency and waveform corresponding to the power rating, as determined from the following formula:  $RCWV = \sqrt{P \times R}$ 

Remark: RCWV: Rating Continuous Working Voltage (Volt.) P: power rating (Watt) R: nominal resistance ( $\Omega$ ) In no case shall the rated DC or RMS AC continuous working voltage be greater than the applicable maximum value. The overload voltage is 2.5 times RCWV or Max. Overload voltage whichever is lower.

| Vibration                              | $\pm 1\%$ : ±(1%+0.1Ω) Max.<br>±5%: ±(2%+0.1Ω) Max.  | MIL-STD-202<br>Method 204                            | 5g's for 20 min., 12cycle each of 3 orientations.<br>Note: Use 8"*5"PCB. 031" thick 7 secure points onone<br>long side and 2 secure points at corners of opposite<br>sides. Parts mounted within 2' from any secure point.<br>Test from 10-2000Hz.   |
| ESD                                    | ±(3.0%+0.1Ω)Max.   | AEC-Q200-002   | With the electrometer in direct contact with the discharge tip, verify the voltage setting at levels of $\pm 500V, \pm 1KV, \pm 2KV, \pm 4KV, \pm 8KV$ , The electrometer reading shall be within $\pm 10\%$ for voltages from 500V to $\leq 800V$ .   |
| Solderability                          | 95% coverage Min.  | J-STD-002  | For both leaded & SMD. Electrical test not required.<br>Magnification 50X. Conditions:<br>a) Method B 4hrs at 155 °C dry heat, the dip in bath with $245 \pm 3^{\circ}$ C, $5 \pm 0.5$ s.<br>b) Method D: at 260 $\pm 3^{\circ}$ C, $30 \pm 0.5$ s.  |
| Flammability                           | No ignition of the tissue paper or scorching or the pinewood board   | UL-94  | V-0 or V-1 are acceptable. Electrical test not required.   |
| Board Flex                             | $\pm (1\%+0.05\Omega)$ Max.  | JIS-C-6429   | Y/X=3/90mm 60 seconds  |
| Resistance to<br>Soldering Heat        | $\pm (1\% + 0.05\Omega)$ Max.  | MIL-STD-202<br>Method 210                            | Condition B No per-heat of samples.<br>Dipping the resistor into a solder bath having a temperature of $260^{\circ}C \pm 5^{\circ}C$ and hold it for $10\pm 1$ seconds   |
| Flame Retardance                       | No flame   | AEC-Q200-001   | Temperature sensing at 350°C, Voltage power subjected to 32VDC current clamped up to 350VDC and decreased in 1.0VDC/hour.  |

#### 13. Soldering Condition

(This is for recommendation, please customer perform adjustment according to actual application)

13.1 Recommend Reflow Soldering Profile : (solder : Sn96.5 / Ag3 / Cu0.5)

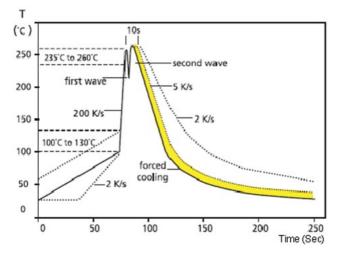

| (Is max to Ip)   | $5 \cup 7$ second max. |
|--|------------------------|
| Time maintained above :<br>Temperature $(T_L)$<br>Time $(t_L)$                     | 217℃<br>60-150 seconds |
| Peak Temperature (Tp)  | 260°C                  |
| Time within ${+0 \atop -5}^{\circ}$ C of actual peak Temperature (tp) <sup>2</sup> | 10 seconds             |
| Ramp-own Rate  | 6°C/second max.        |
| Time 25°C to Peak Temperature  | 8minutes max.          |

Allowed Re-flow times : 2 times

Preheat:

Remark : To avoid discoloration phenomena of chip on terminal electrodes, please use N2 Re-flow furnace .

13.2 Recommend Wave Soldering Profile : (Apply to 0603 and above size)

### 15. <u>Note</u>

15.3. Storage conditions as below are inappropriate:

- a. Stored in high electrostatic environment
  - b. Stored in direct sunshine, rain, snow or condensation.
  - c. Exposed to sea wind or corrosive gases, such as Cl<sub>2</sub>, H<sub>2</sub>S, NH<sub>3</sub>, SO<sub>2</sub>, NO<sub>2</sub>, Br etc.

© Uniroyal Electronics Global Co., Ltd. All rights reserved. Specification herein will be changed at any time without prior notice.

<sup>15.1.</sup> UNI-ROYAL recommend products store in warehouse with temperature between 15 to 35 °C under humidity between 25 to 75% RH. Even under storage conditions recommended above, solder ability of products will be degraded stored over 1 year old.

<sup>15.2.</sup> Cartons must be placed in correct direction which indicated on carton, otherwise the reel or wire will be deformed.
